

## REVOLUTIONARY BIOTECHNOLOGY

Developed with an award-winning physicist and prominent Ph.D. doctor, the **Biotic Wave System** from **Beauty & Wellness Technologies Inc.** is the most advanced bio-impedance micro-current technology with artificial intelligence available today, says the company. A calibrated computer emits precise electrical impulse waves through the skin into associated nerves that mimic the body's natural contraction and relaxation patterns. Applying it to a focused area results in rapid firming, lifting and toning of skin and muscles with increased blood flow—providing visible improvement in just one treatment!
