SPAFINDER LIFESTYLE

“Vanessa Williams is a great client of mine and our treatment centers. She sends many of her friends and co-workers. In 2009 we prepared her for the Emmy’s, several TV talk shows and an episode on Ugly Betty, filmed in the Bahamas where she wore a revealing bathing suit and looked great! She really loves getting our “Miracle Facial” and also gets several different body firming, cellulite and organ cleanse treatments.”

The actress and recording artist, who stars in ABC’s critically acclaimed hit series *Ugly Betty* and whose latest album, *The Real Thing*, was released in June 2009, filled us in on how she stays balanced, her favorite beauty treatments, and the joys of a good foot rub.

SF: What are your favorite spa and beauty treatments?

VW: I am a huge fan of treatments at the Goddess Repair Shop [a day spa with locations in California and New York City]. They offer microcurrent treatments that increase your collagen, elastin, and muscle tone and also can be used for detox. Microcurrent treatments have been popular in Europe for years, and the results are remarkable.

I also really like hot stone massages and thoroughly enjoy a hot-oil facial, where they drip warm oil on your face and massage it through your hair—heaven. And I can’t forget about feet—there is nothing like having your feet massaged!

She says “our Miraculous Collagen Cream is the best product she has ever used”. She also uses our Cellulite Algae Cream and Cellulite Firming Oil to stimulate her circulation and firm her thighs. She also uses our Replenogen A Firming Gel to keep her neck firm and lifted.
